## STUCCON

### FLEXIBLE CRACK-RESISTANT COATING THAT LOOKS & FEELS LIKE STUCCO

**STUCCON** is an acrylic liquid emulsion for mixing with various aggregates to achieve a flexible, crack-resistant coating. Different tints, colors and application techniques can be used to achieve any texture and look desired. The binding characteristics in **STUCCON** make it a versatile product for many surfaces.

#### BONDS TO

Insulated Concrete Forms  
EPS Insulation  
Concrete  
Stone  
Wood

#### ADVANTAGES

- Weatherproof
- Compatible with EPS Insulation
- High Impact Resistance
- Crack Resistant
- Uniform Color Throughout
- Mixes Easily
- Nail or Drill without Cracking
- Exterior and Interior Finishes

The use of metal lath along with a clean surface is recommended for secure bonding of **STUCCON**. **STUCCON** may be troweled or sprayed on.

Approx. Coverage of 1 gallon of **STUCCON** mixed with 50 lbs. of graded or white silica sand (fine or medium) = 30 sq. ft. at 3/8" thick

# WATERPROOFING

## BASEMENT BARRIER

WATERPROOF FOUNDATION COATING

**BASEMENT BARRIER** is a liquid emulsion used to coat and waterproof foundations. A key ingredient of **BASEMENT BARRIER** is ground-up rubber from recycled tires, which is mixed with an acrylic adhesive. Its high solids-content allows a thick, waterproof coating to quickly be built-up. **BASEMENT BARRIER**, when cured, forms a monolithic, flexible membrane.

### FOR USE ON

Insulated Concrete Forms  
Concrete  
Metal  
Wood  
Asphalt

Applied to Perma Form  
Insulated Concrete Forms

### ADVANTAGES

- Flexible to move with expansion and contraction of the applied surface
- High solids-content builds a thick waterproof coating quickly
- Does not become brittle
- Spray or roller application
- Water clean-up
- Contains no asphalt

To apply, use a 1/2" nap roller or commercial airless sprayer. In areas with wet soil conditions, two coats are recommended.

Approx. Coverage on EPS Insulation: 30-35 sq. ft. per gallon per coat
